Leon Winfield

Vice President of Information Technology/Accounting

The Fan Club International

Email: lwinfield@fanclubinternational.com

Leon Winfield has been working in **computer technology for over 30 years**. He started over 30 years ago at **Computer Micrographics Inc.** **Leon** was first hired to make deliveries. His determination and desire to learn motivated him within a few short months to learn to operate all the computer equipment within the company. Within his first year he learned to modify, input and program the majority of computer data on the computers, most of which was self taught.

Over the years, **Leon's** self motivation to learned to program \$250,000+ micrographics equipment open the door of opportunity to become the company's manager. A year after taking over a

branch of **U S DataCorp** that was in jeopardy of being closed, **Leon's** computer experience and personal work ethics help make the failing company one of the most profitable branches in 38 states. **Leon's** effort in the development of computer data help solve the sales force's problem of customer communications and helped them go out and capture more business and bring in new orders.

Now at **Micrographics Inc**, **Leon's** skills helped programmed computers to do what the manufacturer said the computers were not capable of doing. This gave his company the competitive edge. **Leon's** team was able to fix the quirky problems that the manufacturer was unable to fix. After his company refused to renew their service contract, many expected them to close within thirty days.

Leon took charge of the situation and personally reviewed all the computer manuals implemented the schematics to repair and program the computers to work efficiently. At that point the equipment worked better than ever. **Leon** has established a professional reputation for getting the job done.
